DataScience | AI/ML | Full Stack Developer

[linkedin.com/in/iamwaheedkhan/](https://www.linkedin.com/in/iamwaheedkhan/)

Highly analytical Computer Science & Data Analytics student at IIT Patna (GPA: 9.5/10). Seeking a Data Science internship to leverage expertise in Machine Learning, Statistical Modeling, and Predictive Analytics. Proven track record in building end-to-end AI pipelines and delivering data-driven insights through advanced visualization.

SKILLS

- | | | |
|--|--------------------------------|-------------------------------------|
| • Machine Learning | • MongoDB | • Tailwind CSS |
| • Retrieval-Augmented Generation (RAG) | • Express.js | • Bootstrap (Framework) |
| • TensorFlow | • React.js | • Python (Programming Language) |
| • Pandas | • Node.js | • Object-Oriented Programming (OOP) |
| • NumPy | • Mongoose ODM | • REST APIs |
| • Seaborn | • Embedded JavaScript (EJS) | • SQL |
| • Matplotlib | • HTML5 / HTML | • Git |
| • Beautiful Soup | • JavaScript | |
| | • Cascading Style Sheets (CSS) | |

PROJECTS

1. RAG based AI Teaching Assistant

An intelligent teaching assistant that "watches" your lecture videos and answers questions based on their content. This project uses OpenAI Whisper for transcription and a RAG (Retrieval-Augmented Generation) pipeline to provide context-aware responses from your own video data.

github: <https://github.com/waheedkhan70/RAG-Based-AI-Teaching-Assistant>

2. House Price Prediction

Predict property values by analyzing location, square footage, amenities, and market trends using regression algorithms.

github: <https://github.com/waheedkhan70/House-Price-Predictor>

3. Movie Recommendation

Forecast box office success or user ratings using historical data, genre, cast, and marketing analytics.

github: <https://github.com/waheedkhan70/Movie-Recommendation>

4. Crop Prediction

Optimize agricultural yields by analyzing soil composition, climate data, and rainfall patterns using machine learning.

github: https://github.com/waheedkhan70/crop_prediction

5. Grade Prediction

Estimate student performance by evaluating past scores, attendance, study habits, and engagement through predictive modeling.

github: <https://github.com/waheedkhan70/Predict-Grade>

6. Desi Holmes – AI Forensic Assistant for Crime Case Analysis

Empower forensic experts with an AI-driven platform that streamlines evidence processing, automates crime scene reconstruction, and generates investigative leads through advanced pattern recognition and data analysis.

github: <https://github.com/waheedkhan70/desi-holmes>

7. Twitter Clone

Build a real-time social platform featuring microblogging, user interactions, hashtag tracking, and seamless media sharing.

github: <https://github.com/waheedkhan70/twiller>

8. Wanderlust Airbnb Clone

Develop a full-stack hospitality platform featuring property listings, interactive maps, secure bookings, and seamless user reviews.

github: <https://github.com/waheedkhan70/Wanderlust>

EDUCATION

Bachelor of Science (BS) —Computer Science & Data Analytics

Indian Institute of Technology Patna (IITPatna)

• Relevant Coursework: Linear Algebra, Probability & Statistics, Data Structures, Machine Learning, Database Management.

2024—2027
GPA: 9.0/10.0

ACTIVITIES

Winner - Hacktoberfest 2025

1st runner up — IIM Amritsar (Represent IIT Patna).

GooglexKaggleAIagents—Certified in building autonomous AI work flows and LLM orchestration.
